SORB Hearing Examiner caught using Facebook to talk about his cases Eric Tennen helped uncover a SORB hearing examiner who was publicizing his biased and unprofessional thoughts about his job. This is just another example of why the SORB does not work. Not only is there no real science supporting what they do, the people they hire are unqualified and clearly biased. We hope this story will lead to positive reform at the agency.

[See Video 1] Former Official Criticizes Sex Offender Registry Board This also highlights the lack of quality hearing examiners at the SORB. This is the same agency that criticized A.J. Paglia's competency, and forced him out, despite being the longest tenured hearing examiner at the time. A.J.'s work over the years was well respected by lawyers and courts, yet somehow the agency saw fit to replace him with persons like Mr. Lynch. Here is another Channel 5 investigative report that provides additional background on A.J.'s case.
